

Clamp Type Vibration Damper for ADSS/OPGW cables, with tuning fork structure of Damper Weight, is validated by China Electric Power Research Institute that there are four frequency between ...

Because of the concentrated stress, vibration damper will cause some damages to the cable. The armor rods provide proper stress distribution on the optical cable and protect the cable.

Vibration dampers are widely used to control aeolian vibration of the ADSS cable and earth wires including optical ground wires (OPGW). When the damper is placed on a vibrating conductor, ...

The FIBERLIGN Dielectric Damper is a motion control product used to dissipate aeolian vibration that may occur on ADSS cable spans. Using the recommended number of dielectric dampers minimizes ...

This damper is especially designed for installation with ADSS fibre optic cables, improving the performance of the conventional stockbridge vibration damper when used with this kind of cables.

The Hubbell spiral vibration damper (SVD) reduces Aeolian vibration on ADSS cable, Conductor, and Shield Wire/OPGW. Aeolian vibration is a high frequency, low amplitude caused by wind passing ...

Choose from our selection of vibration dampers, including over 14,700 products in a wide range of styles and sizes. Same and Next Day Delivery.

It is an interference type damper designed to attenuate the energy of cable vibration and restrain cable vibration amplitude by impacting with its damping section, so as to protect cables.

It is made of high-quality materials with excellent durability and stability, which can effectively reduce the vibration generated by various optical cables during operation, ensuring the stable operation of the ...

OPGW Vibration Damper Vibration dampers work to cancel damaging fatigue caused by wind-induced vibration. Most tuned damping devices operate best near their natural frequencies.
