

Under the pressure of dwindling resources and increasing violence in Afghanistan, the US military developed an AI system in 2019 to predict Taliban attacks. It was surprisingly accurate.

This monarchy lasted almost half a century, until Zahir Shah was overthrown in 1973, following which the Republic of Afghanistan was established. Since the late 1970s, Afghanistan's history has been ...

Raven Sentry began operating in late 2020, but the US withdrawal from Afghanistan in 2021 cut the experiment short. In that brief time, the project demonstrated how AI could benefit ...

Inspired by the development of novel technologies such as Artificial Intelligence, this article argues that the current usage and development of such technologies can foreshadow possible...

Using the methodology developed by assistant professors Signe Lai and Sofie Flensburg (2019) from the University of Copenhagen, this study traces the underlying infrastructures that allow - or ...

A report by a U.S. Army Colonel involved in the AI operation in Afghanistan dubbed Raven Sentry was developed to help forces predict future attacks by the Taliban during the drawdown.

Afghanistan, officially the Islamic Emirate of Afghanistan since the Taliban took control, is a mountainous, landlocked country in South-Central Asia at an important geopolitical location. It ...

Afghanistan's worsening humanitarian crisis is being driven by the accelerating erosion of fundamental rights - especially for women and girls - alongside mass displacement, economic ...

Discover Afghanistan. Explore Afghanistan facts, culture, history & comprehensive country profile with maps, statistics & research resources for students & travelers.

Raven Sentry had its origins in October 2019, when American forces in Afghanistan were facing a conundrum. They had ever fewer resources, with troop numbers falling, bases closing and...

Thousands of Afghans who assisted US forces are stuck in limbo in Qatar. Instead of promised resettlement in America, they face an uncertain future in another war-torn country. Nothing prepared...

Afghanistan is a multi-ethnic state at a nexus where numerous Eurasian civilizations have interacted, traded, migrated through, and often fought. Invaders and conquerors include the Persian Empire, ...

So what does the future hold for AI in Afghanistan? While there are certainly obstacles to overcome, it's clear

that technology has the potential to transform this country in profound ways.

I had also recently graduated from the Army War College, where I completed a study on how the commercial sector employs artificial intelligence, and I felt that the conditions were right for...

This article examines Raven Sentry, a project that employed artificial intelligence to provide advance warning of insurgent attacks in Afghanistan.

Afghanistan, landlocked multiethnic country located in the heart of south-central Asia. Lying along important trade routes connecting southern and eastern Asia to Europe and the Middle East, ...
