

# Air bubbles after fiber optic cable splicing

- it's normal to see a line at the splice point whenever you're splicing MM fibers or dissimilar fibers. this is totally expected and does not impact splice loss.

Dirt or entrapped air may cause a bubble or bubbles, resulting in a possible high-loss fusion splice. In order to prevent bubbles in your fusion splice, consider the following steps:

Static electricity is an enemy of fiber optics and splicer electronics, especially in dry environments and/or air conditioning. ...

There are bubbles or cracks in the joints during welding. This situation may be due to poor cutting of the optical fiber, such as inclined end faces, burrs, or unclean end faces.

Bubbles or cracks at the splice during fusion splicing. This may be due to poor fiber cutting, such as a tilted end face, burrs, or unclean end face. Clean the fiber before performing the...

Static electricity is an enemy of fiber optics and splicer electronics, especially in dry environments and/or air conditioning. Static electricity can build up in your clothes and body, so the ...

After completing a splice, you notice a small dot or bubble at the splice point on the screen image. The fiber appears fused, but a visible imperfection is present exactly where the two fibers were joined.

I'm having a bubbling error while splicing 100/350 um optical fiber (core/cladding) on the Fujikura FSM100P+. I have tried some ways such as changing Prefuse power and Prefuse time but to...

This bubble resulted from dirt on the fiber end surface. Proper care should be taken care of during cleaning process of fiber optics by using appropriate cleaning device such as isoprophyl ...

Standard methods of dealing with bubbles are centrifuging and vacuuming. These are generally rapid and effective ways of vanquishing bubbles. However, if there are still some lingering ...

The Problem: Another common Fusion Splicing Machine Problem occurs when the plastic protective sleeve doesn't shrink correctly or has bubbles inside. This usually happens because the sleeve is the ...
