

Anti-tracking temperature control cabinets for edge computing

Discover a full range of cooling systems for your data center and computer room air conditioning technologies that save energy and water while simplifying deployment.

Explore what Edge computing is and how it (and the right IT enclosure system) can handle scalability, security, protection, disruptors, and standalone solutions.

The temperature can be controlled via a door-mounted terminal with a display and keypad as well as remotely via Ethernet access and web interface. Whether minor or major adjustments to the ...

Our passionate team of designers, engineers, manufacturers, and sales associates, work hard to provide you with the most advanced, highest quality service, and cost-effective climate control and ...

Outdoor telecom cabinets need rugged enclosures and advanced thermal management to protect edge computing equipment from dust, moisture, and extreme temperatures. Real-time ...

Eaton's industry-leading thermal management solutions, coupled with its broad range of server and network racks, enclosures and cable management, help customers meet evolving technology ...

Our vast selection of cabinets, thermal management, racks, enclosures for data centers, telecommunications equipment rooms, and enterprise cabling applications help optimize space, ...

Ideal for extremely demanding industrial and outdoor applications, Pfannenberg's DTS units provide NEMA 4 level of protection from washdown conditions and caustic air and can operate ...

Creating a fresh air system within an enclosed space is easier said than done. The accumulation of heat within an enclosure threatens all electrical devices. We provide a range of cabinet thermal solutions ...

House your entire edge computing infrastructure in a single secure, prefabricated micro data center cabinet with self-contained cooling, monitoring, & more.
