

Application of 780nm Laser Diode in Monaco

With over 25 years experience providing 780nm lasers to researchers and OEM integrators working in various markets and applications, and 1000s of units fielded, we have the experience to ensure you ...

We report a high-power, efficient, ultra-narrow diode laser using a Faraday anomalous dispersion optical filter (FADOF) as an external cavity element. By inserting a 87Rb-based FADOF ...

Mouser offers inventory, pricing, & datasheets for 780 nm Laser Diodes.

The Lasermate LD780A10C17 is a 780nm, 10mW laser diode in a 25.6mm, TO-18 can package and with operating temperature of 70°C. The laser diode is suitable as a compact light source for many ...

In this work, we present a miniaturized narrow linewidth IF-ECDL packaged in a butterfly-style package. Operating at 780 nm, the IF-ECDL distinguishes itself by its relatively small footprint and superior ...

ROHM's 780nm high-speed laser diodes are widely used primarily as light sources for laser printers. They are also ideal for use as a general laser light source in sensor application.

Award for high saturation power O-band semiconductor optical amplifier in optical information, communication, and security applications (Innovation Award, Laser World of Photonics / Europa ...

PD-LD Inc. offers a variety of packaging options for its" 780nm Series of laser diodes. These units are available in ready-to-use, fiber-coupled packages, including FC, ST, and SC receptacles, as well as ...

These devices are centered at 780nm and are offered in a fiber-coupled butterfly package. They also come with a monitor diode, thermistor, and thermoelectric cooler (TEC). The most common ...

Laser diodes are classified based on continuous operation - Contact us for any special requests regarding classification or power limitation.
