

CoBot Package Smart REIKU Dress Packs have been designed to fit on Universal Robots. Each CoBot cable management kit comes complete with conduit, 2 rotating arm assemblies 2 connectors with ...

Improve cable management on FANUC CRX cobots with IGUS cable routing solutions. Enhance safety and efficiency in your automation setup.

Our Cable Saver(TM) Solution eliminates downtime, loss of revenue, expensive cable and hose replacement costs, maintenance labour costs. It's available in three sizes 36, 52 and 70 mm. All of ...

Hook and loop tape combined with light brackets makes it easy to adapt to any cobot on the market. Metal clamps with more than 10 diameters available to adapt to several cobot models. When ...

Organize and secure pneumatic and electric lines running down your robot arm. Clamps have (4x) channels for tubing and cables up to 8mm diameter. Kit includes 2 clamps, one 12in. strap, and one ...

Multiaxis cable and hose carrier kits include a multiaxis cable and hose carrier, mounting brackets, and a disassembly tool. The length of the carrier determines compatibility with specific brands and models ...

Use these accessories to mount carriers to your machinery without creating an obstruction. Clamp Connector--Brackets with a clamp connector can hold a robot end-of-arm-clamp (sold separately), ...

With decades of experience in industrial robotics, BizLink designs, assembles, and installs standard and customized robotic dresspacks for industrial robots and special machines.

Fast movements of the robot arms generate high accelerations and therefore high tensile forces on the cable carrier. To transfer these tensile forces, ROBOTRAX™ has a hole at the center of each chain ...

As six-axis robots evolve, cable-management systems need to develop along with them. Designers should consider the less-is-more approach for every robotic applications, as it eliminates cable ...
