

For over 40 years, CMC Microsystems has accelerated research and created a path to commercialization in advanced technologies: microelectronics, photonics, micro-electromechanical ...

CMC offers multi-project wafer services and related fabrication services in a variety of technologies for researchers who intend to create a working prototype. Technology areas include microelectronics, ...

FABrIC is an initiative designed to strengthen the Canadian semiconductor and smart sensor industry by creating a talent pool of highly qualified people, encouraging innovation in the ...

Detailed info and reviews on 8 top Semiconductor Manufacturing companies and startups in Canada in 2026. Get the latest updates on their products, jobs, funding, investors, founders and ...

CMC makes real-world processes - microchip (chip) design, fabrication and test - available at institutions across Canada affordable for highly qualified graduates that join Canadian companies or ...

CMC Microsystems provides services to simplify access and reduce cost to advanced technologies, including microelectronics, photonics, IoT and Edge AI, MEMS, Nanofabrication and Integration, and ...

The Canadian Photonics Fabrication Centre (CPFC) is the only end-to-end pure play compound semiconductor wafer manufacturing facility in Canada. The CPFC works with clients from start to ...

CMC simplifies cost-effective access to design software, prototyping, testing, and packaging for advanced technologies like microelectronics, photonics, sensors, and quantum. &#169;2026 CMC ...

CMC Microsystems is a Canadian not-for-profit accelerating innovation in microelectronics, photonics, MEMS, and quantum technologies. It provides cloud-hosted CAD tools, ...
