

Compatible Low-Loss Co-packaged Photonics Supplier in India

By precisely controlling the laser writing on the glass substrate, it can achieve high-precision three-dimensional waveguide structures. This technology has the advantages of low loss, high density, and ...

With our expanding portfolio of photonics and high-speed I/O test instruments, we work with world-leading photonics developers and manufacturers to build scalable test solutions that deliver a ...

LIGENTEC provides open-access to its mature modular technologies for low loss integrated photonics based on Silicon Nitride (SiN), including advanced heterogeneous integration with Thin-film Lithium ...

CPO solutions by ASMPT enable high-speed data and energy-efficient Co-Packaged Optics packages--optimize electronics and photonics integration now.

Founded in 2018, Ultra-Low Loss Technologies is a leader of ultra-low loss photonic integrated circuits, providing our customers with a complete photonics solution with short design and manufacturing ...

Rethinking the limits of AI, Lightmatter merges photonics and computing to build a future where speed, efficiency, and intelligence converge.

Imec's low autofluorescence and stable SiN platform enables the development of extremely sensitive, low-cost and disposable solutions for sensing and bio-photonics applications in industries such as ...

Search for and compare optical components from manufacturers around the world, or for custom jobs we'll match you with an industry expert service provider.

Utilization of Si packaging capabilities o 2.5D and 3D Interposer functionality for co-packaging of electronics/photonics with Thru Silicon Vias
