

ZXR10 8900E series are high-end modular core switches featuring large switching capacity, full L2/L3/MPLS service capability, high-performance, superior reliability and enhanced security.

ZXR10 8900E series Core Switch Product Description Overview ZXR10 8900E switch is ZTE's new generation enhanced core switch. With years of experience in telecom network, ZTE designs and ...

ZXR10 8900E series core switch is a milestone of the decade from ZTE. With supreme T-bit capacity, cluster architecture and rich service ability, ZXR10 8900E family brings a new generation networks ...

The ZXR10 9900 Series switches is ZTE's new generation of large-capacity, high-performance, highly reliable core switches oriented to data center. It provides large switching capacity, high density ...

Product description for ZXR10 8900E Series Core Switch. Covers features, functions, architecture, applications, and technical specs. Ideal for network planning.

The ZXR10 9900/9900-S Series switches are ZTE's large-capacity, high-performance, high-reliability core switches oriented to data centers. They provide ultra-large switching capacity, high-density ...

ZXR10 8900E series Core switches are the latest introduced products presented by ZTE with high capacity and performance for the core or aggregation layer of the network.

Backed by over three decades of carrier-grade telecom hardware engineering, ZTE's ZXR10 series delivers non-blocking switching capacity, advanced telemetry, and ITU-T G.8032 ring ...

It is designed for core and aggregation layers of next-generation campus network scenarios. It allows fast, non-blocking switching and has full IPv6 features.

The ZTE ZXR10 switch family is not a commodity alternative--it is a purpose-built, high-density forwarding engine that meets 112G SerDes (800GbE-ready) roadmaps.
