

200G QSFP56 AOC (Active Optical Cable) assemblies are designed to support 100G/200G Ethernet and InfiniBand EDR/HDR, suitable for data center and HPC (High-Performance Computing) links up ...

Have any questions? Talk with us directly using LiveChat.

The 200G QSFP56 active optical cable is designed for use in 200Gb/s systems, it offers high port density and configurability, and a much longer reach than passive copper cables in the data centers.

These AOC assemblies are QSFP DD MSA compliant, also backwards port compatible with existing QSFP modules and provide flexibility for end users and system designers.

Product Description This is an Arista Networks® AOC-Q-Q-200G-25M compatible 200GBase-AOC QSFP56 to QSFP56 active optical cable that operates over active fiber with a maximum reach of ...

200G AOC cables deliver high density and speed, supporting next-generation Ethernet applications. With a reach of up to 100 meters, 200G AOCs are immune to electromagnetic interference and ...

200G QSFP-DD AOC Active Optical Cable 200G AOC Cable, QSFP-DD, multimode fiber, customize cable lengths up to 100 meters

200G AOC Cables from JTOPTICS are Active Optical Cables that offer lightweight, flexible, and low-power connectivity. Designed for high-performance computing and networking environments, they ...

The 200G QSFP56 active optical cable is designed for use in 200Gb/s systems, it offers high port density and configurability, and a much longer reach than passive ...

What is the difference between Active Optical Cable and 200G AOC? Active Optical Cable is a general class of fiber cables with built-in electronics; 200G AOC refers specifically to those ...

High-bandwidth 200G active optical cable for short-reach, high-density data center links. Delivers low-latency, low-EMI connectivity with flexible routing compared to copper.
