

Current Status of Spectrometer Development in China

It is crucial to systematically study the development, distribution, and industrial pattern of mass spectrometry technology to understand the overall progress of mass spectroscopy instruments in China.

China's spectrometer and spectrophotometer market is projected to grow at a CAGR of +1.5% through 2035, reaching 112K units valued at \$1.1B. Analysis covers production, consumption, import-export ...

SCIEX, a global leader in life science analytical technologies, announces the localization of its X500R QTOF system, ZenoTOF 7600 system, and ZenoTOF 7600+ system in China.

The China Handheld Spectrometer Market is poised for significant growth over the next 5-10 years, driven by rising consumer demand, technological advancements, and supportive regulatory...

By recognizing the teams in China with these localization efforts, SCIEX will enhance responsiveness, ensure greater product accessibility, and deliver world-class precision and ...

The China Mass Spectrometry Market is experiencing significant growth driven by increasing investments in research and development activities, particularly in the pharmaceutical and ...

The SCIEX accurate mass spectrometry portfolio is purpose-built for real-world problem solving, allowing scientists to use a range of quantitative and qualitative approaches to unlock new...

By integrating financial incentives, regulatory support, and human capital development, the government accelerates domestic innovation and positions China as a competitive hub for mass ...

China accounted for 9.22% of the global Mass Spectrometry Market size in 2024. By 2033, United States is expected to remain the top global market in terms of size. Within Asia Pacific, China is ...
