

# E2000 Connector High Temperature Resistance Installation Instructions

Install E2000 optical fibers to customer's fiber cable: remove the black cap, insert the connector into the adapter, and coil E2000 optical fibers to customer's fiber cable in the box.

The E-2000™ connector is a pioneering connector known for its unmatched optical performance and long-standing reliability.

Learn how to install the new E2000 fiber connector on Piuma probes with this step-by-step guide. Includes connection scheme and adapter installation.

## INSTALLATION.

For repeatable and secure pre-mating and mating procedures, the E-2000™ BACKPLANE has a high adaptation degree of the connectors at the PC Board to the backplane mating adapter.

Watch this step-by-step tutorial explaining how to assemble a revos E-2000™ Fiber Optic Connector. Learn more about the ideal tools and how to splice with a ZEUS splicer from Diamond.

The correct installation of E2000 connectors is crucial for the long-term performance and reliability of fiber optic networks. As an established industry standard, the E2000 connector meets the ...

Lever Connector Compact Duplex Two E-2000 connectors can be joined together to make a duplex connector by using the COMPACT DUPLEX CLIP and the DUPLEX CONNECTOR LEVER.

The mechanical and colour coding system allows fast and secure installation of connectors and adapters, ensuring mating without risk of confusion. Connectors and adapters without coding are still ...

The E2000 fibre optic products offer both pre-loaded and fully modular systems to reduce installation time and maximize design flexibility for lower total system cost.
