

It's not real often, mostly just lighting and outlet circuits. Those I don't really worry about - worst that could happen is a light fixture pops, and they're explosion-proof anyway.

I am comfortable replacing an outlet (using the appropriate rated outlet and in-use cover) but I was concerned that the heat might have cause some damage to the wire further in the wall.

PHOENIX, Ariz. (NBC, KYMA/KEY) - A man is in critical condition after an explosion occurred at a Home Depot in Phoenix on Tuesday. The man reportedly sustained critical burn ...
