

The fiber cable is wrapped on the reel at the factory in tight symmetrical wraps around the drum which is greater than the minimum bending radius (MBR) rating of the fiber cable.

In this informative guide, we'll walk you through the step-by-step process of stripping and preparing fibre optic cable for termination, covering techniques, tools, and best practices to help you ...

In this video, we will show you how to unpack the Apex closure and prepare the CAU for cable entry.

In this guide, we'll walk you through the entire process of preparing fiber optic cable for splicing and termination to fiber connectors. We'll explore the necessary tools, safety precautions, ...

In this informative guide, we'll walk you through the step-by-step process of stripping and preparing fibre optic cable for termination, covering ...

Slide the cable cap back onto the cable and carefully cut away the cap with scissors or side cutters. Working at the cable end of the grip, use side cutters or scissors to carefully cut away the cable tie ...

The following article explores best practices when pulling fiber optic cables and cable assemblies. Following these guidelines will help protect your system's optical performance, reduce ...

Explore FOC's technical content library for Fiber Optic Cable Prep videos. Search our comprehensive database of resources produced by cable assembly experts.

After the cable jacket is cut, bend the cable over your thumb slightly to break the jacket loose all the way around. Pull off the end of the jacket to expose the fiber. You will need about 1m (3 feet) of exposed ...

Expand your fiber optic knowledge with The Fiber School's on-demand video library. Our collection of fiber optic training videos covers essential topics such as fiber optic testing, cleaning, termination, ...

Learn how to install underground fiber optic cables safely and efficiently. Explore trenching, conduit selection, direct burial methods, splicing, ...
