

Fiber Optic Communication Anti-interference Equipment

Our R& D team has over 20 years of professional technical experience in design, develop, build, support and delivery of end-to-end RF communications& advanced mesh networkings.

In multi-drone formations or cluster operations, fiber optic links avoid co-channel interference between multiple wireless devices, enabling reliable point-to-point or point-to-multipoint ...

Our company independently develops and produces fiber optic anti-interference devices, which can solve signal free scenarios and are not affected by electromagnetic interference. They are suitable ...

With the help of wired fiber-optic communication, the indoor inspection drone breaks through the limitations of short-wave transmission, ignores the obstacles of the underground environment, and ...

Learn how to minimize signal interference in fiber optic systems and discover the latest technology trends and solutions.

Key Selling Points: High-accuracy,Easy to operate,Competitive price Customized support: OEM,ODM Fiber Support: 0.27-0.4mm Function: Fiber Signal Transmission Material: Plastic Model: G657A2 ...

The fiber optic data module offers high-speed and stable performance to meet the demands of large data transfermission. It is immune to electromagnetic interference, and can prevent eavesdropping ...

Replace RF with a physical optical fiber link to achieve stable HD transmission, ultra-low latency control, and strong immunity to EMI / RF-contested environments.

The Fiber Optic Reel offers a sleek, durable solution for storing and managing optical fibers with ease. Built for reliability, it ensures smooth cable deployment without straining the fiber.

Our FPV UAV Fiber Optic Image Data Transmission Module is specifically designed for real-time image transmission in UAVs. It utilizes advanced fiber optic communication technology to ensure efficient ...
