

Since its founding, EAE has grown rapidly, expanding its production and areas of operation by incorporating EAE Lighting in 1983, EAE Machinery in 1996, EAE Electrotechnics in 2004, and EAE ...

With our fire protection for cable systems, we ensure that your lines meet the highest safety standards and are reliably protected in the event of an emergency.

FIRSTO is specifically suitable for the fire resistant ducting of cables and/or cable trays through wall and floor penetrations. No other firestop can offer the high level of security with the flexibility, time and ...

Two full-scale fire experiments on PVC cables used in nuclear power plants were carried out, one with cables in vertical position and one with cables in horizontal position. The vertical cable bundle, 3 m ...

The Daken Fire-Resistant Cable Tray (DFCT ) is a new-generation cable protection system that integrates fire resistance, structural load-bearing capacity, and ventilation into one single solution.

The FireMaster instrument control cable tray system is Factory Mutual Approved for 30 minute hydrocarbon fire protection of instrument control cable trays in accordance with ASTM E1725-95 ...

This paper presents a computational fluid dynamics-based method to model the HRR of such cable fire. The method is partly based on the FLASHCAT model (modified and adapted here) and the surface ...

How do cable trays perform in fire conditions? To uncover the answer to this question, we have conducted tests on cable tray systems in different materials.

Whether you need certified fireproofing, firestopping, insulation, or photoluminescent safety systems, our team is ready to support your project with rapid response and code-compliant solutions.
