OSFP

Discover how OSFP modules provide high-speed optical connectivity for data center applications. Learn about the different form factors, data rates, ...

The product supports 800Gbps transmission speeds in an industry-standard, pluggable OSFP form factor with 5nm DSP and can be widely used in metro carrier, access and Cloud/DCI applications.

This specification defines the electrical connectors, electrical signals and power supplies, mechanical and thermal requirements of the OSFP Module, connector and cage systems.

Designed for high thermal capacity, electrical scalability, and forward compatibility, OSFP modules now drive connectivity across 400G, 800G and the emerging 1.6T generation.

To accommodate both high-power optical and dense copper solutions, the specification will define separate but compatible heatsink specifications for both optical and copper modules, allowing ...

A Type 2 OSFP module provides maximum of 16mm additional length in front than a Type 1 module, and a Type 3 OSFP module provides maximum of 3.6mm additional height in the front than a Type 2 ...

An in-depth comparison of OSFP and OSFP-XD packaging for 1.6T optical modules, explaining differences in channels, bandwidth scalability, thermal ...

An in-depth comparison of OSFP and OSFP-XD packaging for 1.6T optical modules, explaining differences in channels, bandwidth scalability, thermal design, power consumption, and ...

OSFP is designed to support the next generation of 800G optics modules that will use eight lanes of 100Gbps, and offers backwards compatibility with 100G QSFP. They are compliant with the OSFP ...

Octal Small Form-factor Pluggable (OSFP) solution that fits into high-density switch and router client ports for optical interconnect links. Powered by Greylock and Delphi DSP ASICs, and silicon ...

OSFP (Octal Small Formfactor Pluggable) is a high-speed optical module packaging technology designed to meet the growing demand for ultra-high bandwidth and density in modern ...
