

Manufactured with our patented outside vapor deposition (OVD) process, Corning's HI 780 specialty fiber offers world-class durability and reliability. When used as component pigtails, this fiber allows for ...

They are constructed by fusing and tapering two fibers together. The fused fiber couplers have low excess loss, low polarization dependent loss, low back reflection, high stability, high reliability and ...

Idealphotonics offers a wide range of narrowband and wideband single mode 2x2 Single Mode Fiber Optic Couplers, also known as taps, as highlighted in the table to the right. Couplers that can be ...

Features Low Excess Loss Variety Coupling Ratio Epoxy-Free Optical Path High Reliability and Stability Low Profile Packaging

In conclusion, if you're looking for a fiber coupler with stable performance, exquisite design, and high flexibility, then the hi780 fiber coupler is definitely worth considering.

We provide 850nm single mode fiber coupler (made using Corning HI780 fiber). The coupler has 1x2 or 2x2 configuration, and its coupling ratio can be from 1/99 to 50/50.

780nm 830nm 850nm fused tapered optical fiber coupler (also called tapered splitter, FBT coupler) can couple the optical signals transmitted in the optical fiber at the junction area of the special structure ...

It specializes in R& D, manufacturing, sales of Optical Passive Components. With the great technologies in optical research and production, Seifree gathers a number of optical talents on fiber ...

When used as component pigtails, this fiber allows for efficient fiber coupling within photonic products. It also offers reduced bend attenuation due to its high core index of refraction. Corning's HI 780 ...

Corning's suite of high-index fibers are used across telecommunications, aerospace, and industrial markets in applications such as wavelength division multiplexing (WDM) couplers, splitters, and ...
