

Optical Connection Interconnection scheme among external AOC, optical module and optical cable cabinets

In 2025, the Company introduced LRO and LPO optical modules based on a "light active" design concept, aiming to reduce transmission power consumption and end-to-end latency.

Our optical modules feature traditional DPO, low-power LRO, LPO, and Active Loopback designs for testing, and support data rates from 10G up to 1.6T across a wide range of package types.

Among the key highlights is Luxshare-Tech's 1.6T OSFP DR8 optical transceiver built on silicon photonics. This module delivers high-bandwidth connectivity with low power consumption per ...

Our CPO technology completely subverts the traditional pluggable optical module architecture by co-packaging the optical engine and the switching chip, achieving a leapfrog breakthrough of...

These state-of-the-art transceivers will combine POET's industry-leading 100G/lane and 200G/lane optical engines with Luxshare Tech's advanced optical module designs. The optical modules will be ...

From high-density 1.6T and 800G transceivers to plug-and-play AOCs and industry-leading optical fiber -- our portfolio delivers power-efficient bandwidth and clean, serviceable installs that support AI, ...

The company's 400G QSFP-DD DR4 DPO and 800G OSFP DR8 DPO optical modules are specifically designed for Intel's Gaudi AI servers, meeting the stringent requirements for data transmission ...

The optical modules will be manufactured and sold globally by Luxshare Tech. Selected POET optical engines will be integrated into existing Luxshare Tech products that are already on the ...

Luxshare Tech will manufacture and sell the optical modules globally. Also, selected POET optical engines will be integrated into existing Luxshare Tech products that are already on the...
