

# How long does it take to build a custom-made cold aisle server room

Our modular systems provide flexible, secure separation between hot and cold aisles or controlled zones to maintain optimal environmental performance.

Cold aisle containment works in virtually any data center using traditional air cooling, but some facilities see faster returns than others. If you're delivering cold air through a raised floor with perforated tiles, ...

What we can share is capability. Parco designs and builds fully custom hot and cold aisle containment enclosures using modular T-slot aluminum framing. These systems are engineered around your rack ...

Following a collaborative, customer-driven approach, we provide the best containment options for each project. Whether ceiling hung or integrated with aisle structure, our containment solutions are ...

We can design and engineer fully customized hot aisle containment components to help optimize your data center's cooling efficiency. We will work closely with your team to design a system that includes ...

**Pre-Fabricated** Our pre-fabricated solutions are pre-cut and assembled to save time on-site. The system is pre-configured to create hot or cold aisle containment, supported by the cabinet and/or ceiling.

The right aisle containment system can have a big impact on your data center's efficiency and the effectiveness of the equipment within it. DAMAC's engineers collaborate with you to design a custom ...

**Cool Shield(TM)** products provide customers with versatile, turnkey aisle containment systems for new or existing critical spaces. Our offerings range from a single row in a server room to entire data center ...

Complete cold aisle containment guide for data centers. Learn CAC benefits, implementation steps, and achieve 35% cooling cost reduction.

Faztek's t-slotted aluminum frames and panel profiles offer versatility to create aisle containment systems to meet your data center's needs. Choosing between hot or cold aisle containment often ...
