

How to connect an industrial-grade switch to a ring network

Learn how to design a fiber optic ring network with practical diagrams, topologies, and switch setup tips. Explore ring network switch options for industrial applications.

The Ethernet Ring Protection Switching (ERPS) protocol is a powerful technology and service that can be used on industrial switches to ensure high network ...

Depending on their firmware capabilities, both devices and switches can operate as supervisors or ring participants on a DLR network. Only some DLR devices, such as switches, can operate as ...

Case Communications X-Ring provides an Ethernet Ring between Industrial Ethernet switches, running at 10 Mbps, 100 Mbps or 1 Gbps.

In this blog post, we will walk you through the key steps and considerations involved in successfully implementing industrial grade switches to ensure seamless connectivity in challenging ...

Figure 2, shows a network with spanning tree automatically blocking one of the redundant or ring path connections. Spanning Tree will set a port on one of the switches to a blocking state so ...

The Ethernet Ring Protection Switching (ERPS) protocol is a powerful technology and service that can be used on industrial switches to ensure high network availability and prevent network downtime.

Connect the switches using network cables or optical fibers according to the determined ring network topology. During the connection process, it is necessary to pay attention to the ...

O-Chain is also a proprietary protocol (described in Application Note 05 O-Chain) specifically designed to easily connect several Weidmüller switches to any existing network or topology in a redundant way.

Device Level Ring (DLR) is a Layer 2 protocol that enables redundancy in a ring topology, providing fast network fault detection and reconfiguration for industrial networks.

How to connect an industrial-grade switch to a ring network
