

How to install a double-ended two-hole junction box

Most junction boxes have holes in their sides, called "knock outs." Run each cable through one of the holes and attach them to the box with Romex or cable connectors.

Feed the cables through the built-in cable clamps and insert the box into the hole. The NEC requires at least 1/4-inch of the exterior plastic sheathing to be inside the box.

A junction box provides a code-approved place to house wire connections, whether for outlets, switches, or splices. Here's how to install one.
