

# Intelligent lighting control for different power distribution boxes

NX Lighting Controls provides a digital network for wired, wireless, and hybrid connectivity with device auto-configuration for out-of-the-box operation with mobile app for simple configuration and ...

This group of devices can perfect the lighting levels in different environments by adjusting the system based on the presence of occupants or on different distribution of the light within the environment itself.

Intelligent Lighting Controls" EVO Distributed Controls help you save start-up expense and time. Check out options and talk to a representative today!

Engineered to simplify energy management and code compliance, the Intellect Intelligent Fixture Control System requires only two devices--Intellect-enabled fixtures\* and an Intellect Keypad Room ...

Intelligent panelboards for automated lighting control and improved energy efficiency. Reduce energy costs as much as 30% by automatically turning off lighting during unoccupied periods.

These devices combine traditional modular wiring boxes with intelligent DALI lighting control, saving on equipment whilst still providing a plug and play lighting solution. ...

To combat this issue, this article presents an easy-to-install, low-cost, Master-Slave intelligent LED light-controlling system based on Internet of Things (IoT) techniques.

Eaton's Pow-R-Command panelboards provide electric power distribution with integrated breaker, fuse, meter, and surge protection. Designed to meet UL67 standards for data center, industrial, ...

Working closely with system designers, LynTec incorporates electrical protection, circuit switching capabilities, and an operational controller within a common enclosure -- saving valuable wall space, ...

What is Distributed Intelligence? Distributed intelligence means that all lighting control actions, such as turning on/off or dimming lights, are carried out locally within each individual lighting zone. This ...

The Lighting Control System work shall be indicated on the drawings and by the requirements of this section. It is defined to include, but not limited to: Intelligent panelboards, containing both standard ...

Delta Controls delivers intelligent lighting control that goes beyond illumination--integrating wellness, efficiency, and sustainability into every building. Whether through wired, wireless, or hybrid solutions, ...
