

Low Noise Fiber Ethernet Switches for Safe City Projects

TJ1400P M2 switches are enterprise-plus class L2/L3 Switches with Carrier Ethernet features specifically optimized for LAN applications and Metro Applications, support <50 ms convergence.

Designed for harsh conditions, E-link industrial Ethernet switches provide stable network performance in extreme temperatures, high humidity, ...

Smart City solutions leverage advanced technologies like IoT, AI, and big data to enhance urban infrastructure, improve public services, and promote sustainability.

Moxa provides a wide range of industrial Ethernet switches that feature industrial-grade reliability, network redundancy, strengthened security, easy management, and competitive price-to ...

Designed for harsh conditions, E-link industrial Ethernet switches provide stable network performance in extreme temperatures, high humidity, and electrically noisy environments.

They are built to exceed the specifications of commercial switches with industrial safety certification and approval for hazardous locations, making them ideal for use at sites with harsh environmental ...

WAGO's range of switches ensures the scalability of your ETHERNET network infrastructure, while providing outstanding electrical and mechanical characteristics. Unmanaged and managed switches ...

OmniConverter compact ethernet switches feature one or two fiber ports and up to eight 10/100/1000 copper ports for fiber distance extension to network edge devices. OmniConverter compact switches ...

Ethernet Switches with fiber uplink ports or all fiber switches, commercial grade, managed and unmanaged and PoE enabled are all available in this section.

From municipal buildings to public spaces, Velolan Networks' Ethernet switches, PoE media converters, and extenders form the backbone of modern urban infrastructure--seamlessly connecting WiFi ...

WAGO's range of switches ensures the scalability of your ETHERNET network infrastructure, while providing outstanding electrical and mechanical ...

With the Ethernet-APL switches you can realize the direct two-wire Ethernet connection of sensors or field devices in process technology applications and potentially explosive areas.
