

Magnification of Fiber Optic Endface Inspection Instrument

A fiber inspection scope is used to examine the polished end of a terminated fiber. The scope illuminates and magnifies the fiber tip so scratches and other defects can be seen.

FiberSafe Fiber Endface Microscope KI6608: 40x magnification is ideal for inspecting POF and MPO/ MT ferrule full end-face.

Dimension can provide a full range of fiber end-face inspection and cleaning solutions to effectively improve product quality and reliability. Dimension is committed to creating a series of optical fiber ...

Dimension's Dual-Magnification Fiber Optic Inspection Equipment enables fast, efficient inspection of fiber end-faces using both 400x and 200x magnification. With dual-screen simultaneous display or ...

MANTA series: handheld and benchtop use Compact microscopes for endface inspection of all types of single and multi-fiber optical connectors, patch cords and bulkhead ...

Bynet fiber inspection tools offer 400x magnification & automated pass/fail analysis for connector end-face inspection. Includes handheld/video microscopes & probes for LC/SC/FC/MPO.

Equipped with a 10-inch HD monitor, it delivers clear, enlarged images at 400X, 200X, or 80X magnification, making it ideal for identifying defects after polishing or during fiber use.

HTO-7000B fiber end face detector with 200X/400X magnification. Supports LC, SC, FC, MPO/MTP and SMA905 for precise connector inspection

Dimension's Dual-Magnification Fiber Optic Inspection Equipment enables fast, ...

Our fiber optic inspector tools offer networking installers many choices of endface inspectors and probes including single/multi-fiber analyzers, full endface test systems and optical microscopes with up to ...

The LBTEK Benchtop Fiber Endface Inspection Microscope is equipped with a high-definition, high-resolution TFT display, capable of producing high-quality, low-distortion imaging of fiber endfaces ...
