

We provide leading-edge fiber optic development capabilities and advanced manufacturing experience to support high-volume production of complex fiber optic products for the medical device market.

These fiber optic sensors of the optoCONTROL CLS-K series enable a wide variety of applications, from monitoring the presence of and recognizing the position of components in automatic assembly ...

We are a leading manufacturer of cooled and uncooled infrared thermal imaging camera and modules, surface or underwater fiber optic gyrocompass and inertial navigation system, fiber optic ...

All of our probes can be manufactured in a variety of materials, path lengths and insertion lengths. The internal optics may also be customized to achieve the required wavelength range.

This article explores the different types of Fiber Optic Sensors, their working principles, and various applications. We'll delve into Intrinsic, Extrinsic, and ...

Our combined capabilities offer customers a unique ability to develop custom fiber sensors for critical environments, at micron precision. We continuously expand our range of specialty optical fiber ...

Market Forecast By Type (Fiber Optic Sensors, Image Sensors, Position Sensors, Infrared Sensors), By Sensor Function (Proximity Detection, Motion Sensing, Light Detection, Color Detection), By End ...

Fiber Optic Sensors offer great flexibility and can be easily incorporated into new or existing designs. The fiber optic cables are non-contact, miniaturized and can fit into remote, tight spaces that would ...

This article explores the different types of Fiber Optic Sensors, their working principles, and various applications. We'll delve into Intrinsic, Extrinsic, and Hybrid fiber optic sensors, explaining how they ...

Discover the intricacies of fiber optic sensor designs, their key components, applications, and future trends in this comprehensive guide. Learn how they enhance data accuracy and ...
