

This application note explains PAM4 theory and its operation. It describes NRZ and PAM4 fundamentals, standards using PAM4 coding schemes, and CEI-56G Interconnect reaches and ...

However, PAM4 provides faster signaling rates without significantly increasing design challenges. For a given speed, it has only half the Nyquist frequency of NRZ - 14GHz compared to 28GHz. Therefore, ...

Since CTLEs are passive filters, they're no different in PAM4 systems than in PAM2-NRZ systems, but with four symbol levels, the decisions that PAM4 DFEs feedback are more complicated.

Understand PAM4 signaling basics and how it differs from NRZ. Expert insights on testing challenges, eye diagrams, and validation for 400G/800G ...

With a converter cable, it is possible to convert NRZ links to PAM4 and vice versa. The products include: PAM4 to 4x100G QSFP NRZ. The 400G cable breaks out from 1 x 400G (8x56G ...

If we switch a signal from NRZ/PAM2 to PAM4 while maintaining the same maximum voltage level of 400 mVpp, the four voltage levels of the PAM4 signal will nominally map to 400 mV, 266 mV, 133 ...

Multiple electrical and optical lanes are used to increase transceivers' data rates to 100 Gbps (either multi-fiber or single-fiber WDM). To break the 200 and 400 Gbps barrier an amplitude modulation ...

Two coding schemes are possible: Non-Return-to-Zero (NRZ), also known as Pulse-Amplitude Modulation 2-Level (PAM2), and Pulse-Amplitude Modulation 4-Level (PAM4). Because of NRZ's ...

In copper, PAM4 uses four voltage levels to represent two-bits of data per symbol. By encoding two or more bits per symbol, PAM increases the data rate without increasing the required channel bandwidth.

PAM4 effectively doubles the data rate for a link bandwidth at the expense of reduced signal to noise ratio (SNR). PAM4 is used in 400GE, 800GE, and 1.6T Ethernet as well as PCIe 6.0 and other ...

Error Mitigations Unlike a similar NRZ ones (at lower data rate), the PAM4 standards do not expect error-free communication without mitigations techniques:
