

Nx661 Microcomputer Relay Protection Tester

Designed for electrical engineers, utility maintenance teams, and third-party testing service providers, the Wuhan Huayi HY661 offers unmatched versatility in microprocessor-based protection relay ...

The HXOT Microcomputer Relay Protection Tester PRE661 is a versatile, high-precision device designed for testing protection relays in power systems. Ideal for power plants, substations, and ...

Smart Multi-phase Relay Protection Tester is a new generation of intelligent relay protection test equipment for Substation ABB, Siemens, SEL, Schneider, NR microcomputer protection device etc.

The 6-phase microcomputer relay protection tester uses the USB interface to directly communicate with the PC, without any adapter wiring, and is convenient to use.

Not only test the traditional relays and protectors, but also test the modern microcomputer relays, special for transformer differential protection and transfer equipment.

The internal modular design of the instrument can independently complete the testing and debugging of devices and components in the professional fields of relay protection, excitation, metering, wave ...

The 6-phase microcomputer relay protection tester uses the USB interface to ...

Microcomputer 6 Phase Relay Protection Test Device play a key role in operating electricity power systems reliably and safely. It is the testing device used in professional field of microcomputer ...

After years of hard work, our Relay Protection Microcomputer 6 Phase Relay Tester Test Kit has been recognized in the global market, and is favored by more and more customers for its stable product ...

Microcomputer relay protection tester is composed of high-integration, bus-out chip single-chip microcomputer, high-precision current and voltage transformers, high-insulation-strength ...

Nx661 Microcomputer Relay Protection Tester
