

Only Microcomputer Relay Protection Test System A660

Only-Aq660 Protector Relay Test Equipment, Find Details and Price about Power Supply from Only-Aq660 Protector Relay Test Equipment - Guangdong Only Electrical Automation Co., Ltd.

1."Built-in industrial control computer + 10.4-inch touch screen", supporting offline operation and having a small size providing ease of carriage; 2. 4 *125V voltage + 6 *35A current power amplifier outputs.

ONLY-A user training manual (microcomputer protection device debugging case and debugging method)

The latest version of the software can be upgraded directly.

Simulation of electrical isolation between the current ground In and voltage ground Un of the output. Such simulation provides greater compliance with wiring requirements on the test field; The software ...

With GPS, IRIG-B, IEEE1588 time synchronization function; 24 independent small analog signal output up to support compatible relay protection equipment to test various receiving small signal; or the ...

Discover the ONLY AQ660-ZH Computer Automation Relay Protection Test and Debugging System for efficient relay protection testing. Ideal for substations, field engineers, and power plants, this ...

1.Built-in industrial computer, 10.4 inch touch screen, support offline operation, small size, easy to carry;
2.With dual network ports, automatic test does not require an external switch, and on-site operation ...
