

Only the fiber optic light on the router is red

A red or blinking PON light almost always indicates a physical issue with the fiber cable: a bend, a break, a disconnected connector, or debris on the optical connector face.

This guide will walk you through what the LOS light means, why it blinks red and step-by-step instructions on how to resolve the issue, including ...

If the Broadband light is solid red it means the router is not receiving a valid IP address from your ONT (Optical Network Terminal). Reboot the router by turning it off for at least 30 seconds.

A red light on a router usually means the device has lost its internet connection or is experiencing a hardware issue. First, check whether your modem is also showing abnormal lights.

If this light is off or red, try restarting your ONT by unplugging it for 30 seconds and plugging it back in. If the light doesn't return to green, log in to your Surf account to check for any reported outages in your ...

If the internet light on your ONT is flashing, it could mean that the device is trying to establish a connection to the fiber-optic network. This is usually a normal part of the startup process, ...

Different factors can cause your router's red light to blink. This can be due to a misconfiguration, a loose cable connection, outdated firmware, a service outage, or other issues.

Understanding LED Indicators on a Fiber Router Let's break down what the common LED lights on a fiber router mean and how they behave: 1. POWER Normal: Solid/stagnant light. If OFF: The router ...
