

They perform uniformly over a wide spectral range, with ultra-low losses. PPC splitters are highly compact, reliable and available in very wide range of fiber and connector types. All PPC PLC splitters ...

ABS splitter provides stable, low-loss signal distribution in fiber networks. Ideal for FTTH, PON, and data systems needing durable PLC splitters.

PLC Splitter Conclusion PLC Splitters are indispensable components in fiber optic networks, offering reliable, high-performance signal splitting for a variety of applications. When ...

Planar Lightwave Circuit (PLC) splitter provides highly stable splitting performance superbly across temperature and wavelength in low insertion loss, low input polarization sensitivity, excellent ...

PLC Fiber Splitter Solutions for FTTH Networks Low insertion loss, high uniformity, and stable optical performance for telecom operators, FTTH deployments, ODN networks, and data centers.

Bynet manufactures high-performance PLC fiber optic splitters with low insertion loss and high uniformity. Available in 1xN, 2xN configurations and various port counts for FTTH, PON, and CATV ...

The PLC optical splitter is a fundamental component in modern fiber optic systems, enabling efficient, scalable, and reliable signal distribution. With its superior uniformity, low loss, and wide application ...

FS Bare Fiber Splitters are engineered for high-density networks, offering exceptional scalability and reliability. FS PLC splitters come in a full range of 1xN and 2xN models, with customizable split ratios ...

Spring Optical provides PLC splitters for FTTH and GPON networks, including LGX cassette, ABS, rack mount and MPO types with low loss and high stability.

Corning's QuickPath(TM) PLC optical splitters reduce insertion loss and deliver high performance. These devices enable more effective monitoring and management of optical networks. They are available ...
