

Our 1310nm single mode line serves a broad range of applications including optical data storage, printing, laser ranging, illumination, defense, spectral analysis, and graphics.

The FP-1310-4I-LCx is an MOCVD grown InAlGaAs ridge laser diode with emission wave-length of 1310 nm and standard continuous light output of 5mW per facet. These lasers provide stable, single ...

LASER COMPONENTS Canada designs and manufactures fiber-pigtail pulsed laser diodes (PLDs) at 905 nm. These stacked devices are precisely engineered for high-speed and high-power applications.

Laser diodes form a subset of the larger classification of semiconductor p - n junction diodes. Forward electrical bias across the laser diode causes the two species of charge carrier - holes and electrons ...

nanoplus FP laser diodes in the range from 840 nm to 1100 nm are ideally suited for all spectroscopic tasks where a broad laser emission spectrum and a short coherence length is required.

Look up a data sheet for a previously sold item. Our customer service teams will reach out if these items are revised. We welcome your thoughts!

The laser diode selector allows you to specify the wavelength, power and package and download datasheets for a wide range of high quality laser diodes.

Laser Diode Tutorial The purpose of this laser diode tutorial is to provide the information necessary to create a long lifetime, stable laser diode system. Much of what will be discussed will be in general ...

Lasers Leading laser innovation since 1966 Coherent is a recognized leader in the laser industry, bringing technical innovation and superior reliability to the broadest spectrum of applications. Our ...

LNCT28PF01WW - Laser Diode from Panasonic Corporation. Get product specifications, Download the Datasheet, Request a Quote and get pricing for LNCT28PF01WW on GoPhotonics.
