

Polish Fiber Optic Adjustable Attenuator Manufacturer

All attenuators are machine polished to a scratch-free end face for increased performance and low return loss. Optical performance is 100% tested to ensure dB loss accuracy for each precision-doped ...

Thorlabs has a wide variety of single mode (SM), polarization-maintaining (PM), or multimode (MM) fixed and variable optical attenuators (VOAs). We offer SM and PM electronic VOAs that provide control of ...

Shop DigiKey's large in-stock selection of Fiber Optic Attenuators. View inventory, pricing and order now for same day shipping!

FC Adjustable attenuator Fiber optic attenuators are used in the fiber optic links to reduce the optical power at a certain level. We supply various kinds of fiber attenuators, including LC, SC, and ST, FC, ...

FS fixed and variable fiber optic attenuators with leading attenuating fibers guarantee consistent and stable fiber attenuation (0~60dB) in WDM transmission.

Fiber attenuators are passive elements of optical fiber path. We are offering many types of these attenuators: from electronic, necessary during testing or diagnostics, to mechanical adjustable or ...

Adapter Attenuators Features Stability of parameters Broadband attenuation characteristics Strong casing made of high quality materials Available in various versions

Our in-line attenuator is customized to match the desired length and connector type specified by customers. The adjustable attenuator utilizes an air gap mechanism to regulate the attenuation value ...

Our Fiber Optic Attenuators are a versatile and reliable solution for attenuating singlemode fiber connectors in both lab and commercial applications. The attenuators are constructed of high-quality ...

A variable attenuator is a device that allows for adjustable reduction of signal power in a fiber optic link, offering flexibility to fine-tune signal strength according to changing network requirements or varying ...
