

When held low by the host, the module responds to 2-wire serial communication commands. The ModSelL allows the use of multiple QSFP-DD modules on a single 2-wire interface bus. When ...

These digital coherent optics modules enable 800G traffic over amplified DWDM links up to 120 km for 800ZR and over 1000 km for 800G ZR+. They expand Cisco routed optical networking ...

GIGALIGHT's 40G QSFP+ PSM4 optical transceiver module is designed for medium to long-distance interconnections in data centers. It is compliant with the 40G Ethernet transmission protocol and ...

The series uses 8 pairs of parallel single-mode fiber optic transmission with a central wavelength of 1310nm and distances up to 2km or 10km (both with FEC on), with optional industrial grade operating ...

It works with 4 CWDM 25Gb/s DML lasers, and has a 2xLC/UPC duplex optical connector type. The module is compatible with the QSFP28 MSA standard. We program the modules before shipment to ...

GIGALIGHT 200G QSFP-DD PSM8 20km optical transceiver modules are used for medium to long distance interconnections in data centers and are compliant with 100G PSM4 MSA specification and ...

QSFP-DD LR8 Optical Module Similar to LR4, the "LR" in QSFP-DD LR8 optical module denotes long-distance transmission of 10km. It uses eight DML lasers with LWDM wavelengths and ...

In a DML, data modulation occurs by varying the Injection Current, an on/off electrical signal directly applied to the laser diode chip, resulting in a modulated optical signal.

FS 40G QSFP+ optical transceiver module solutions offer a full range of QSFP+ modules from 150m to 80km reach, and used for high-density switching, routing ...

Cisco QSFP-DD and OSFP 800G coherent optical modules are supported on Cisco switches and routers. For more details, refer to the Cisco Transceiver Modules Compatibility Matrix.

QSFP modules implement a 2-wire serial interface based on I2C protocol for configuration, monitoring, and diagnostic functions. This interface provides access to a ...
