

# Remote Monitoring Solution for Italian Hybrid Energy Systems

Using machine learning and AI, the company display real-time energy consumption, cost and CO2 emissions. The IoT solution includes the hardware and the app, helping users reduce ...

This research study analyzes the design and implementation of a secure and smart monitoring network for hybrid energy systems using two of the most widely known Internet of Things ...

The technologies used in these systems are constantly evolving but their current maturity level already makes it possible to design innovative approaches and tools for the operation of ...

This innovative technology allows you to centrally monitor and control your systems from anywhere, ensuring unprecedented operational efficiency. In addition, through advanced remote ...

Recently, Net Surfing was commissioned by a world-renowned eyewear manufacturer to implement an energy monitoring system for its main factory and five sub-factories in Italy.

BaxEnergy, a leader in energy control and asset performance management, has joined forces with Yokogawa Italy, a subsidiary of Yokogawa Electric Corporation, to deliver an advanced automation ...

Easily configure, monitor, and download data for PV and hybrid plants in real time.

As a leading provider of smart energy management solutions, we offer a range of modern and innovative products for hybrid microgrids, energy price management and remote monitoring and control of ...

We lead in renewable energy monitoring and control, specializing in solar, wind, and storage. Our SCADA and PPC systems provide real-time data, alarms, and remote control, optimizing plant ...

In this scenario, SENECA proposes an integrated system for the rationalization of power consumption and analysis. A completely innovative solution with multiple benefits designed using two latest ...
