

Ep-131 # Cable tray & Trunking Modeling | Type Name filter and color In Revit | By Sanjay Si

How do I change the colors of the cable trays / cable trunking in Revit? Let's say I have submain cable trays, ELV trunking, and other types of electrical trays, and I want to change their ...

Changing the color of a cable tray in Revit requires a systematic approach to modify the appearance of the element within the project. Below are detailed steps to adjust the color settings effectively.

You would need to assign a material to the cable tray or create a selection set in Navisworks. Navisworks only looks for materials, not filters or system overrides.

Download free BIM objects from over 2 000 manufacturers. Choose among BIM objects for SketchUp, Autodesk, Revit, Vectorworks or ArchiCAD.

So I created one and had it select Cable Tray and Cable Tray fittings as the selected categories to show in the filter. Changed the line colour to Red and all the trays and fittings changed to Red in my plan.

A color can be applied to an Ionic component in order to change the default colors using the color attribute. Notice in the buttons below that the text and background changes based on the color set.

You can go to Manage -&gt; Settings -&gt; Object Style -&gt; Set material for the cable tray category (NOTE: This setting will affect all cable trays) Add view filters for the different cable trays -&gt; Add the filter in ...

Is there any way to make the Basket tray a different color then the ladder cable tray? We are wanting to show the Basket tray as a steel color and the cable tray as red.

In AutoCAD this is achieved by using different layers and although we have similar methodologies in Revit via the System Styles where we can set ...
