

# Selection Guide for 800G Core Switches with Relay Protection Level

The Edgecore DCS560 / AIS800-640 is a high-performance, low-latency switch ideal for data centers, AI/ML clusters, and high-performance computing. It features 64x OSFP800 ports and Tomahawk 5 ...

The switch provides the highest density of 800G Ethernet ports with 51.2 Tbps of switching capacity making it highly suitable for building large flat scale-out network fabrics.

Our Bulletin 800H Type 7 and 9 Hazardous Location Push Buttons offer unmatched selection, excellent corrosion resistance, and choice of conduit seal-off solutions.

The SSE-T8164 comes with 64 OSFP 800G ports in a 2RU form factor to meet the leaf, spine and super spine datacenter architectures. The interfaces provide flexibility to meet a variety of speeds and use ...

When selecting and verifying catalog / part numbers for 800G ATEX Class I, Zone 1 and Zone 2 Push buttons and Stations, selector switches, pilot lights, emergency stop (e-stop) explosion ...

Cisco N9364E-SG2 switches introduce high-density 800G aggregation for the data center fabric. They also offer various lower port speeds and densities, including 400, 200, and 100 Gbps. ...

Selector Guides GE's unique tool for identifying the best solutions for protection & control across the entire power system

Discover 800G Ethernet technology and FS 800G AI switches, delivering ultra-high bandwidth, low latency, and lossless performance for AI/ML ...

Discover 800G Ethernet technology and FS 800G AI switches, delivering ultra-high bandwidth, low latency, and lossless performance for AI/ML clusters, HPC, and cloud data centers.

Quickly identify the right Cisco switch for your needs, whether you're looking for a new switch or upgrading an old one for an enterprise LAN, a data center, outdoors, or industrial operations.

Dual push buttons and key-operated selector switches can be selected when configuring a control station. A locking guard can be added over our Emergency Stop push-pull and a locking cover can ...
