

The devices provide direct access to a large range of highly informative data-sets that help to monitor, analyse and optimise the complete power supply concept of any machinery - from the quality of the ...

Large scale, fully-integrated modular power solutions to keep your business online. Read more about our case studies and implementations for our clients and partners. We're always on the move, ...

Our products are key building blocks in the clean-power ecosystem, enabling the generation of renewable energy as well as the efficient transmission and consumption of power in a vast range of ...

Monolithic Power Systems, Inc. (MPS) provides small, highly energy efficient, easy-to-use power management solutions for electronic systems found in industrial applications, telecom infrastructure, ...

Smart grid companies in California focus on modernizing energy infrastructure using digital technology. These firms enable utilities to manage energy more efficiently, integrate renewable resources, and ...

Microchip delivers everything a power conversion design engineer needs: low-risk product development, lower total system cost, faster time to market, outstanding technical support and dependable delivery ...

The company designs, develops, and markets analog and mixed-signal integrated circuits (ICs) and other electronic components and circuitry used in high-voltage power conversion.

Our integrated circuits enable compact, energy-efficient ac-dc power supplies for a vast range of electronic products including smartphones, appliances, smart utility meters, LED lights,...

Power Integrations, Inc. designs, develops, manufactures, and markets analog and mixed-signal integrated circuits (ICs), and other electronic components and circuitry used in high ...
