

The test demonstrated a new way to transmit encryption keys using entangled light particles (photons) over Swisscom's existing fiber optic network. This advancement comes as ...

The fastest, smallest, most reliable optical switches in the industry. Used in medical devices, undersea cables, quantum computers, underground and outer space.

Efficiently manage fiber cables with the POLATIS Switch. Features ultra-low insertion loss, 16x16 matrix, singlemode fiber, 400 Gbs, DirectLight beam-steering, SDN enabled, dual redundant power.

Discover DIAMOND's innovative fiber optic solutions built with 40+ years of expertise. Swiss precision for high-performance applications. Explore now!

The switch joins a full-stack quantum networking effort from Cisco Quantum Labs that spans chips to protocols to apps, all marching toward our north star of enabling distributed quantum ...

COLLEGE PARK, MD - November 5, 2025 - IonQ (NYSE: IONQ), the world's leading quantum company, with luminary Swiss partners, successfully deployed a citywide quantum network in ...

Geneva unveils Switzerland's first quantum network, utilizing existing fiber optic infrastructure for groundbreaking research and development in quantum technologies.

We offer optical switches with integrated MEMS technology, optical switch kits, and PRO8 modules for fiber-optic circuit integration or construction. A selection of high damage threshold, acousto-optic Q ...

This rack-mount device is designed with DiCon's proprietary 3D MEMS mirror technology and delivers industry-leading optical performance. The unit works without any position sensor or feedback loop, ...

The network uses existing fiber-optic infrastructure and IDQ's quantum key distribution systems to enable experiments in quantum communications, entanglement, and ultra-precise time ...
