

The Decline of the Optical Fiber Cable Industry

Our in-depth market data report on Fiber Optic Cable Industry. Explore verified statistics and the latest research.

Both incumbents and AltNets are investing heavily in deploying fibre optic cables to meet the growing demand for high-speed connectivity. Fibre deployment in America is not constrained by ...

From the CRU FOCI (CRU Optical Fiber and Cable Index survey), the optical fiber and cable market was at its lowest point in September-October 2023, and then recovered but at a slower ...

A shortage of fiber-optic cable equipment is blamed on AI data center demands as well as US protectionism.

With tariffs driving up the cost of imported fiber optic cables, supply chains are getting squeezed. That's a problem, considering fiber optics are the backbone of modern communications, ...

Learn about the challenges facing the cable industry and how Corning is lowering deployment barriers and helping deploy faster, cheaper, and better fiber networks.

All of this highlights why fiber optic cables have become such an overlooked strategic resource, one that the U.S. currently can't produce enough of to meet domestic demands.

Russia's only domestic producer of optical fiber has been offline since May 2025 following Ukrainian attacks, industry officials told the Vedomosti business daily on Thursday.

Coupled with the continued decline in optical fiber and cable prices, some companies are facing operational risks. This process inevitably involves reshuffling and consolidation, and only by ...

Fiber optic cables have been at the forefront of communication technology for decades, providing unparalleled speed and reliability. However, with the rapid advancement of technology,...
