

Two-input one-output junction box

The ANYLOAD J04ES-FS and J04SS-FS junction and summing boxes are designed to accept inputs from 2 to 4 load cells, combining their signals into a single output for precise multi-cell balance ...

The one in multiple out junction box is a smart, space-saving, and efficient solution for modern industrial wiring. With modular flexibility and multi-channel output design, it ensures reliable and professional ...

The Pedal Board Junction Box with BJF Buffer has input and output on the top of the enclosure, so you can use it without wasting any space on the pedalboard. When the input is overloaded, it will not ...

I have an existing junction box and currently 1 source from the ...

Split your guitar signal to up to 4 outputs with high headroom, low output impedance buffers! Custom Pedals like this one are built to order and therefore come with a...

The Pedal Board Junction Box with BJF Buffer allows the input and output of the pedalboard to be in the same position, making it easy to decide the placement of your cable.

Up to 16 I/O signals can be consolidated over a single home-run connection on the box. These junction boxes provide a rugged solution with an IP67 rating or greater, making them ideal for both indoor and ...

Complete the Teleco solution and the electrical wiring system with junction boxes. Do you want to receive information? Fill form online.

Buy the Doug Fleenor Design 121D-JBOX Circuit Board with Terminal Blocks in Junction Box. Free shipping, great customer service, free tech support.

I have an existing junction box and currently 1 source from the basement going in, and one source coming out and that goes to a wall switch. If I want to connect a second wire to come ...

Enhance protection and durability with versatile two input one output junction box designed for various electronic applications. Ideal for safeguarding sensitive components.
