

USB interface of the power distribution box

USB-C/PD (Power Delivery) is a wide-spread interface that is scalable for power & signaling. It is a specification for a reversible-plug connector for USB devices and cabling.

USB Developer Days 2019 - Taipei, Taiwan November 20, 2019 USB Type-C™, USB-C™ and USB4™ are trademarks of the Universal Serial Bus Implementers Forum (USB-IF).

Its duties include managing the Power Source and USB-C™ Port Control modules and cooperating with the Policy Engine to adjust the power distribution. Each port is connected to the ...

Imagine my surprise when I discovered that the short XT60 cord, attached to the box that is mounted on top of the slewing scope, is attached to the stationary power brick by (yup, you ...

USB PD (Power Delivery) is an advanced, fast-charging standard that supports various power requirements over a USB connection. Its predecessor, USB (Universal Serial Bus), was a ...

In this article Phil Salmony explores the fundamentals of USB Type-C Power Delivery and learn how to easily incorporate a dedicated PD IC into your own PCB designs.

This demonstration application is fully assembled, programmed, and tested to evaluate and demonstrate digitally controlled smart charging applications for various USB-PD loads.

This application report explains how the TPS2014 and TPS2015 power distribution switches provide the power switching and overcurrent protection needed to meet the USB requirements and how they are ...

This box was designed with video fly packs and custom integrations in mind. It's flexible enough to mount against a side wall, drop into a drawer, recess into a work surface, or live in a 3U ...

USB has always included some capability of providing power to peripheral devices, but the amount of power that can be given has increased over time. The modern specifications are called USB Power ...

Designed to supply power to an entire rack-mounted UniFi system and remotely manage each connection.
