

A fiber-optic cable, also known as an optical-fiber cable, is an assembly similar to an electrical cable but containing one or more optical fibers that are used to carry light.

The 80-pin (4 x 20) QMC(TM) Connectors are available in 9 mm, 11 mm, 14 mm, and 16 mm stack heights. The QMC(TM) Carrier Connector is used for both host (Jx1) and I/O (Jx2) connections.

And that's where QSFP breakout cables come into play - they're the unsung heroes of efficient connectivity. This guide covers everything you need to know about these essential cables, ...

Our comprehensive guide to types of fiber optic cables. Learn all about the differences between single mode and multimode cables, as well as the various fiber wavelengths and standard core sizes used ...

These 100G QSFP28 assemblies are capable of transmitting data up to 100Gb/s, offering an easy installation with a flexible, multimode fiber cable.

The plethora of fiber optic cable types can seem overwhelming, but choosing the right cable for the job is important. Read on to learn what fiber optic cables are and which cables you need.

One of the most versatile and future-ready options available today is the Quad Small Form-factor Pluggable (QSFP) cable. Whether you are upgrading to 100G, deploying 400G, or ...

This series of products adopts LC or MPO optical port and is compatible with IEEE802.3bm, SFF-8436 and other standards; It has the characteristics of low power consumption, ...

What is a Fiber Optic Cable? A fiber optic cable is a type of cable that uses light to transmit data over long distances. It consists of a core made of glass or plastic that is surrounded by layers of protective ...

SFP, QSFP, QSFP-DD, OSFP ACTIVE OPTICAL CABLE ASSEMBLIES Our active optical cable assembly portfolio provides improved cable flexibility and longer reach as compared to both ...

The plethora of fiber optic cable types can seem overwhelming, but choosing the right cable for the job is important. ...
