It provides functions such as line overload protection, short-circuit protection, and circuit switching for indoor lighting and power distribution lines. This type of equipment is suitable for civilian applications ...

The XMJ low - voltage metering box is applicable to the power distribution system with an AC frequency of 50 Hz, a rated operating voltage of AC 220 V/380 V, and a rated current of 250 A and below.

XM series plastic case circuit breaker distribution box (MCCB box for short) is widely used in power plants, substations, factories and mines, hotels, apartments, and high-rise buildings.

XM power distribution box (hereinafter referred to as metering box) is suitable for use as metering device of AC 50HZ TN-C system (three-phase five-wire) with voltage of 220V.
